Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Discussed including into claims 29 and 31 language to reflect that the construction of the device completely blocks air flow through the bronchial passageway when the valve is in the closed configuration. Because the biological valve of Andersen et al. is sewn to the frame, the device would not completely block air flow. The claims would then be rewritten in independent form and include the limitations of all intervening claims.

(A fuller description, if necessary, and a copy of the amendments which the examiner agreed would render the claims allowable, if available, must be attached. Also, where no copy of the amendments that would render the claims allowable is available, a summary thereof must be attached.)
